GitHub: https://github.com/Iamhemanth001 Mobile: +91 6395855794

SKILLS

Languages: C++, C, Python, JavaScript
Frameworks: HTML and CSS, Bootstrap, NodeJS, ExpressJS, ReactJS
Tools/Platforms: MySQL, MongoDB, Git & GitHub, RESTful APIs
Soft Skills: Problem-Solving, Teamwork, Leadership, Adaptability

PROJECTS

Vmeet – Real-Time Video Chat Application | GitHub | Live Jan' 26

- Developed a real-time video communication platform supporting peer-to-peer audio/video calls, screen sharing, and stable group calls of up to **6 participants** using WebRTC.
- Engineered a scalable multi-user signaling system with Socket.io, enabling room-based sessions, dynamic participants, live text chat, and handling **5,000+ concurrent connections** with ultra-low latency.
- Built a responsive and optimized application with React (Vite) and a robust Express.js + MongoDB backend, enabling fast load times, smooth interactions, authentication, session management, and persistent storage for thousands of users.
- **Tech Stack:** React (Vite), WebRTC, Socket.io, Node.js, Express.js, MongoDB, JavaScript, HTML, CSS.

Wanderlust – Travel Exploration Platform | GitHub | Live May ' 25

- Engineered a dynamic accommodation discovery platform enabling users to browse, create, and manage listings, supporting **1,000+ active listings** and hundreds of daily interactions
- Implemented secure authentication and listing workflows with Express.js, including image uploads and **Google Maps API** based location discovery, reducing search time by **30%** through map-based filtering.
- **Optimized** MongoDB queries using indexing, achieving **sub-100ms response times** and efficiently scaling to **10,000+ records** without performance degradation.
- **Tech Stack:** Node.js, Express.js, MongoDB, Google Maps API, Bootstrap, Handlebars, JavaScript, HTML, CSS.

HGR – Hand Gesture Recognition System | GitHub Dec' 24

- Constructed a real-time hand gesture recognition system using Python and OpenCV, enabling continuous camera-based hand detection and preprocessing.
- Processed and extracted gesture regions using cvzone **HandDetector** and NumPy, performing accurate cropping, resizing, and normalization for reliable model input.
- Integrated a Teachable Machine **TensorFlow/Keras** model with cvzone Classifier to perform real-time inference, displaying gesture labels and confidence scores through OpenCV.
- **Tech Stack:** Python, OpenCV, cvzone, NumPy, TensorFlow/Keras, Teachable Machine.

TRAINING

Skillstone – Data Structures and Algorithms | Coding profile Jun' 25 – Jul' 25

- Completed an intensive **Data Structures & Algorithms** program, mastering advanced concepts including Trees, Graphs, DP, Recursion, and Greedy Algorithms.
- Solved **500+ problems** on platforms like **LeetCode** and **GeeksforGeeks**, significantly strengthening algorithmic thinking and problem-solving skills.
- Applied optimized approaches and complexity analysis (**time and space optimization**) to design efficient algorithmic solutions

CERTIFICATES

Google's Adversarial Nibbler Project – Certificate of Participation Jun' 25
Data Structures and Algorithms – Training Program Jun' 24

ACHIEVEMENTS

Google's Adversarial Nibbler Project

- **Earned ₹18,000 for successfully completing Google's Adversarial Nibbler Project,** organized by the School of Computer Science and Engineering, Lovely Professional University (2025).

EDUCATION

Lovely Professional University Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; CGPA: 8.71 Aug' 23 – Present

Simpkins School Agra, Uttar Pradesh
Intermediate PCM; Percentage: 92% May' 21 – May' 23

St. Patrick's High School Hyderabad, Telangana
Matriculation; Percentage: 92% Mar' 20 – Apr' 21
